

SolidWorks Essentials

Pre-Requisites: Familiarity with Microsoft Windows

Schedule: 8:30 a.m. – 4:30 p.m.

Length: 4 Days

Price: \$1195

The goal of SolidWorks Essentials is to teach the student how to use SolidWorks mechanical design automation software to build parametric models of parts and assemblies and how to make drawings of those parts and assemblies.

SolidWorks Drawings

Pre-Requisites: SolidWorks Essentials

Schedule: 8:30 a.m. – 4:30 p.m.

Length: 2 Days

Price: \$595

This course teaches you how to make drawings of SolidWorks parts and assemblies.

SolidWorks CircuitWorks Training

Pre-Requisites: None

Schedule: 8:30 a.m. – 12:30 p.m.

Length: 0.5 Day

Price: \$199

This course teaches how to use CircuitWorks to associate ECAD and MCAD data through import/export of IDF and other ECAD files. This class also discusses how to build an electrical library.

DriveWorks Xpress

Pre-Requisites: None

Schedule: 8:30 a.m. – 12:30 p.m.

Length: 0.5 Day

Price: \$199

This course provides a hands-on approach to setting up a model for DriveWorks Xpress for the purpose of design automation. This course will provide a good understanding of DriveWorks Xpress and DriveWorks.

SolidWorks Mentoring

Pre-Requisites: Familiarity with Microsoft Windows

Schedule: 8:30 a.m. – 4:30 p.m.

Length: 1 Day

Price: \$1200

One-on-one on-site mentoring of SolidWorks CAD tools. This course can only be used by one individual and is non-transferable.
